Request for Information

REF: [REDACTED] 25X1A2g

1. Three Czech firms, Tepla, Neopta, and Chirana are known to be major producers of medical and dental equipment. Insufficient information, however, is available in regard to the quality and quantities of such equipment. It is requested that Brod be given general questioning as any opportunity presents itself, with the emphasis on how Czech equipment compares with say, U.S. or British equipment of the same general types, and also as to the adequacy of supply of such equipment.

2. What types of medical instruments does Czecho import, and from what countries?
